CDC is Proud to Support your Meetup!

Hi Organizers,

We're thrilled to have you involved in the CDC sponsorship program! Below is your 1st newsletter to send to your members as a requirement of this sponsorship.

ORGANIZERS: All you need to do now is share this with your members by forwarding to: **S(campaign.groupListAnnounceEmail)**. Before forwarding, please delete all text appearing in italics as this is intended for organizers only.

CDC is proud to be working with your Meetup! CDC recommends a yearly flu vaccine as the first and most important step in protecting against the flu! While the flu can make anyone sick, certain people are at greater risk for serious complications from the flu, causing hospitalization or even death, including:

- Adults 50 years of age and older
- Children younger than 5, but especially younger than 2 years old
- People with chronic lung disease (such as asthma and COPD), diabetes (type 1 and 2), heart disease, neurologic conditions, and certain other long-term medical conditions
- Pregnant women and women within the first two weeks after delivery (2 weeks post-partum)

Other groups at increased risk of flu complications are listed [here](#).

We're hoping you'll take action to protect yourself and your loved ones by getting vaccinated this season! The week of December 4th is National Influenza Vaccination Week so join your Meetup Group for a "Get Vaccinated" outing and go together to get a flu vaccine. CDC has a Flu Locator that you can use to find out where to go. You can also attend a virtual "Get Vaccinated" Meetup and go get vaccinated at your own leisure. Your Organizer will posting Meetup details on your group calendar soon so stay tuned!

If you want to get a head start on planning, you can find a location nearest you [here](#)!

If you have any questions just [reply to this email](#) and let us know. We're here to help!
